DASHLANE
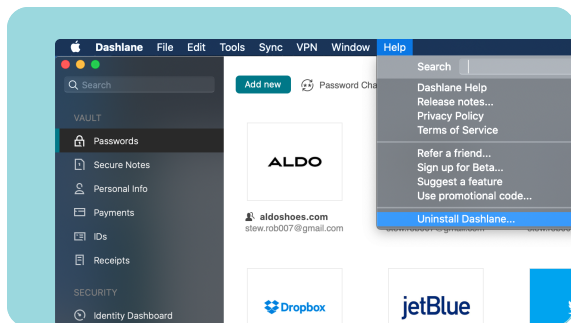

UNINSTALLING THE DASHLANE DESKTOP APP

Starting January 10th, 2022, we will sunset the Dashlane desktop apps and automatically log you out. Once you've logged in to the browser extension and ensured your data is available in the web app, you can uninstall the desktop app from your computer. This guide shows you how.
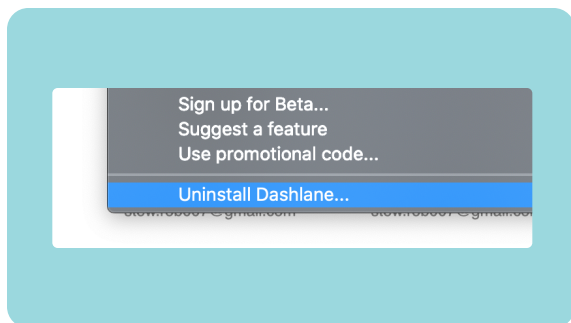

Still need to switch to the web-first experience? Head here.

For extra peace of mind, you can export your data before you uninstall your desktop app. Simply follow these instructions.

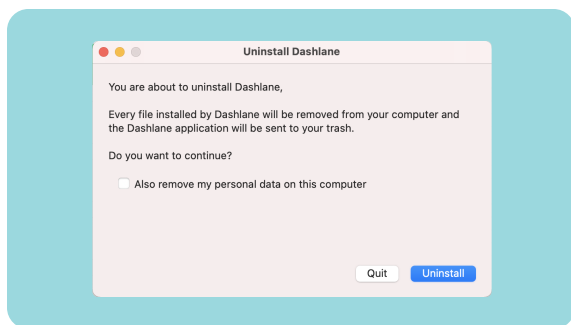

1

Open your Dashlane app. Select **Help** from the menu bar. (Don't see the Help menu? That means you've installed Dashlane from the Mac App Store. Please visit our Help Center for steps on how to uninstall this version.)

2

Select **Uninstall Dashlane.**

3

You'll see a confirmation window that asks whether you want to delete all personal data stored in the Dashlane desktop appfrom your computer. Please note, selecting this option means all your passwords, Secure Notes, personal info, and other data will be deleted from your computer. Click **Uninstall.**
