STANDARDIZED OUTPUT

Now available to Distribution

**You know us,
we know you.
Was there
ever a clearer
choice?**

The MIB Electronic Medical Data Service provides a single point of access to records from multiple data sources across EHRs, HIEs, patient portals and can systemically reflex to a traditional APS retrieval process. We deliver the medical information your underwriters need, in a fast and cost effective fashion, so that when you ask for a record, you find one.*

As a trusted industry partner for more than a century, MIB leverages our industry expertise to provide the education, training and support you need to successfully integrate electronic medical data into your workflows.

MIB—the clear choice for medical records for underwriting.
