

Don Bosco Institute of Technology, Mumbai – 400070
Department of Computer Engineering

Report on: Wordpress Workshop

Title: Wordpress Workshop

Date: 20th September, 2021

Time: 5:00 pm

Venue: Google meet

Excerpt: <https://meet.google.com/joq-myqn-nnm>

Participants on Google meet: 44

Resource Person: Grejo Joby, Hayden Cordeiro

Organizing Department/Committee/Authority: ACM Student Chapter

Faculty Coordinator: Ms. Sana Shaikh

Objective:

- To help students build websites without coding
- To demonstrate design principles and techniques using plugins and themes
- To improve learner's web development skills and think creatively.
- To develop a classified site for business or organization purpose.

Outcomes:

- To observe website performance and handled troubleshooting and WordPress issues.
- To improve learners' ability to create college projects using Wordpress.
- To manage website back-end including plugins, tools, and database.
- To facilitate developers understanding in search engine optimisation.

Report:

Wordpress Workshop was ACM's first collaborative event with IETE for the academic year 2021-2022. The workshop was held on the 20th of September, 2021 at 5:00 pm. The hands-on workshop was kept free for ACM and IETE members whereas non-members had to register for a minimal amount of Rs.30/-. The primary focus behind this workshop was to educate the second-year students of various departments on the attributes of wordpress and how can one create state of the art webpages as also potent blogs without making use of a single line of code with the assistance of wordpress.

The workshop started off with Mr.Grejo Joby(Chairperson-ACM) briefing the audience on the fundamentals of Wordpress and displayed the installation of Xampp and wordpress 5.8.1, which was simultaneously done by the participants as well. After the installation, he then dived into creating a rudimentary website in order to demonstrate various tools and techniques present in Wordpress, He then gave a rundown on the installation of some templates, plugins, extensions, activation of themes and how these are published. Further on he explained, if a website has a requirement of having a database, then how Xampp can be used to help make a proper connection between the front end and back end of a website built on Wordpress.

In addition to that Mr.Hayden Cordeiro(Vice Chairperson-ACM) informed our participants of the various free resources, themes and features available on Wordpress, He also demonstrated designing dynamic blogs with the help of WordPress. He then spoke about the different features of a dashboard and how can one customize it. Further on, he discussed the functioning of the publish button and how often one can utilize it. The participants were also brought up to date with a variety of projects that can be created with the assistance of Wordpress and Xampp and also how diversity can be achieved by playing around with the tools and features made available in Wordpress. Participants were asked to share their creation at the end of the workshop.

Lastly there was a doubt solving session wherein Mr.Grejo Joby and Mr.Hayden Cordeiro addressed all the doubts with scrupulous attention to detail. The participants were then asked to fill the feedback form which was put up in the chatbox, also on filling the feedback form the participants would be provided with an e-certificate of participation, marking the end of the workshop

FEEDBACK ANALYSIS:

The session was relevant and well organised.

28 responses

The Speaker responded to questions in an informative, appropriate and satisfactory manner.

28 responses

Overall the session was informative and valuable.

28 responses

Was the hands on session satisfactory ?

28 responses

Are you interested to attend more events in future?

28 responses

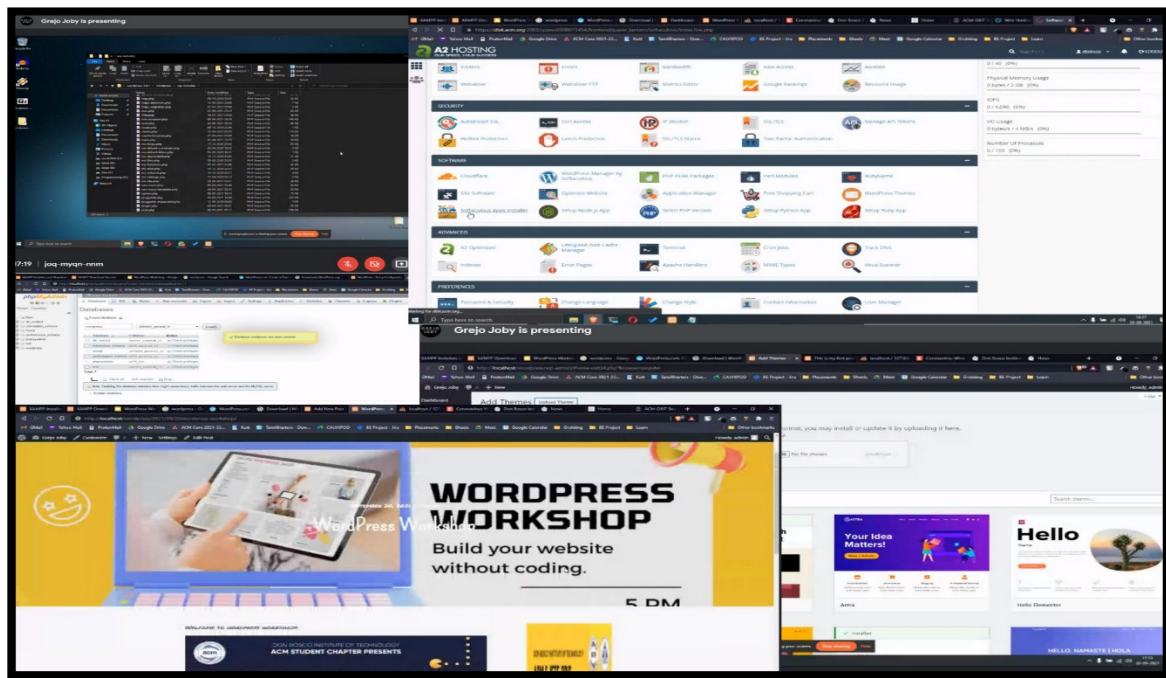

Any suggestions regarding the topic of the upcoming workshops?
