

CS WIN nx[®] SCREW TIGHTENING SYSTEM

The structured CS WIN nx[®] test software with various equipment packages offers high customized functionality and ensures test applications with a maximum of efficiency.

CS WIN nx[®]

– Standard

This is the standard software used for all types of test system. It comprises all standard editors required for cable test systems. The software can be used for cable testing with the CT45 cable tester, and for the Ethernet I/O control of digital I/Os.

All data of the CS WIN can be imported.

This version can also be used to edit the CT15 - CT30ix cable testers.

Package content:

CS WIN nx, Control system, Label printing, Multiple language feature, Editor for cable tester, CS WIN nx user manual, File import from CS WIN 16, Import and export SQL database, Edit, Connector images, Measurements, Cable tester CT45.

– Screw Tightening System

This option allows you to screw or unscrew bolts / nuts with the correct torque and angle on the test item.

Sensors are used to check that the correct position is machined.

Package content:

Screwing tightening and unscrew, Position sensor monitoring
