# INTELLI MOD PROGRAMMER

**Simple and comfortable programming of intelligent test adapters with special functions.**

The IntelliMod programmer provides you with a programming device that allows you to set the parameters of test adapters easily and comfortably for color detection, qualified leak test, ring eyelets or B+. A large, illuminated color display supports you in user-friendly parameterization.

## Features

- Automatic detection of the IntelliMod board
- Easy parameterization
- Secure firmware updates
- Flexible useable
- Easy handling

## Equipment

- Adapter cable to IntelliMod board
- Programmer incl.  
Standard application firmware
- User manual

## Anwendungen

- Qualified leak test
- Color detection
- Ring eyelet test
- B+

## Technical data

Dimensions:	Depth: 35 mm Width: 65 mm Height: 120 mm Weight: 100 g
Processor:	ATMega 128, 16 MHz
Input:	Foil keypad
Output:	2,1" Color display, illuminated
Power supply:	3 x 1,5 V AA, UM-3 batteries
Accessories:	* Firmware versions Batteries Data cable Additional accessories on request

\* There are different firmware versions for different applications of the IntelliMod boards.
