

A focus for analytical chemistry in Europe

What is Eurachem?

Established in 1989, Eurachem is a network of organisations in Europe with a mission to provide a focus for analytical chemistry and quality related issues

**What does
Eurachem do?**

www.eurachem.org

EURACHEM MEMBERSHIP

Eurachem is a network of national organisations

Full membership

- » Countries within the EU and EFTA, European Commission
- » EU accession states
- » Countries with an Association Agreement with the EU

Associate membership

- » Other European countries with good analytical chemical infrastructure

Member countries are represented at the General Assembly by their National Representatives

Eurachem General Assembly

National members
Executive Committee Members
Liaison Organisation Representatives

Eurachem Executive Committee

Chair
Vice-Chair, Past-Chair
Secretary
Treasurer
6 elected Ordinary Members
Working Group Chairs

Eurachem Working Groups

Experts nominated by Eurachem Members and Liaisons

Eurachem activities

GUIDANCE DOCUMENTS

Prepared by Working Groups and available free of charge from the Eurachem website

Translations by member countries encouraged

Eurachem guides

Recommendations on good practice

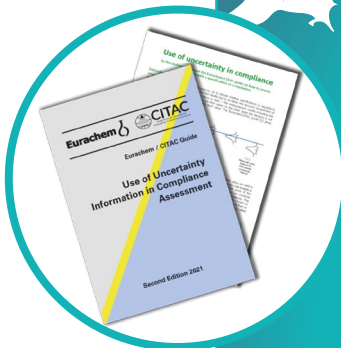

Supplementary guidance

Recommendations on good practice illustrating or amplifying guide topics

Information leaflets

Short documents, introducing a Eurachem guide or providing information on a topic of interest

Visit the Publications section of the website to download documents

WORKSHOPS AND TRAINING EVENTS

- » International workshops and training events with a focus on analytical quality
- » Joint events organised with liaison organisations
- » In person and online events

Visit the Events section of the website to see upcoming events and access content from past events.

Recordings from selected events available on  YouTube

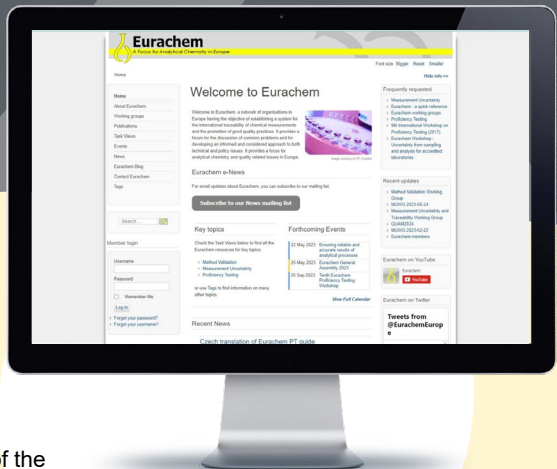

Eurachem Working Groups

The Working Groups develop guidance and organise workshops and training events

- » Education and Training
- » Measurement Uncertainty and Traceability
- » Method Validation
- » Proficiency Testing
- » Qualitative Analysis and Testing
- » Reference Materials
- » Sampling Uncertainty
