

The adventurous wolf pups are here and they are taking over the blockchain. Just like any pup they are scouring, getting into trouble, playing around and making new friends. The pups' goals are to innovate and grow the NFT market on every chain they are on.

There are 2222 pups on Avalanche, Arbitrum, Binance, Ethereum, Optimism, and Polygon. Each chain has a multiverse mirror pup. Collect the matching pup across the 6 chains to be an elite collector. Only the top collectors will be able to collect all 6.

The pups will create a revenue building NFT treasury for Alpha Shares and Pup holders. In the DeFi world a project would buy and sell tokens, but in the NFT world these pups are seasoned NFT traders looking for the best deals, newest mints, and for new projects to join the Alpha Shares playground.

STORY:

On April 3rd, the Alpha Pack Pups will be born into the world of NFTs. These cute and cuddly creatures, each with their own unique personality and characteristics, are the latest addition to the Alpha Shares NFT Marketplace. With a limited quantity of just over 12,000 pups available with 2222 on each of 6 chains, fans of NFT collections and cute animals alike will be eager to get their paws on one of these adorable creatures. [...]

[...]The Alpha Pack Pups offer a fun and creative way to invest in the NFT space. Each pup is available for \$100 stable coin and will be listed on multiple blockchain platforms, including Ethereum, Binance, Avalanche, Arbitrum, Polygon, and Optimism. With their cuteness and value, the Alpha Pack Pups are sure to quickly become one of the most popular NFT collections on the market.

The story of the Alpha Pack Pups is a tale of adventure and discovery. Deep in the forest, a pack of wolves stumbled upon a hidden cave filled with glittering gems and crystals. Intrigued by the sparkling treasures, the wolves decided to investigate further and discovered that the gems had the power to grant special abilities and unique traits to whoever possessed them. The Alpha Pack Pups were born from this discovery, each pup inheriting the abilities and traits of the gems they were born with. From that day on, the Alpha Pack Pups roamed the forests, spreading joy and mischief wherever they went. And now, they're ready to bring their adventures to the world of NFTs.

Their playful curiosity and love of adventure make them the perfect ambassadors for the Alpha Shares NFT Marketplace, as they explore the vast world of NFTs and bring new projects and collections to the attention of the community.

As they explore the blockchains, the Alpha Pack Pups will use their powers to sniff out the most promising NFT projects and bring them to the attention of the Alpha Shares community. With their sharp instincts and playful personalities, the Alpha Pack Pups are always on the lookout for exciting new projects to explore. Whether they're staking NFT assets, arbitrating for profit, or helping to bring new projects into the marketplace, the Alpha Pack Pups are always up for an adventure.

Their constant pursuit of discovery and adventure has earned the Alpha Pack Pups a reputation as some of the most curious and mischievous creatures in the world of NFTs. As they continue to run around the blockchains, they'll be sure to bring their unique energy and playful spirit to the world of NFTs, making new friends and discovering new projects along the way. So whether you're a fan of NFTs, cute animals, or just love a good adventure, the Alpha Pack Pups are the perfect collection for you.

HOW TO PLAY

MINTING RULES:

THE CHAIN ORDER:

2222 will be available on each chain (Avalanche, Arbitrum, Binance, Ethereum, Optimism, and Polygon) We have built in a cross minting capability on the new v2 Alpha Shares Marketplace (Just in case you don't have experience or gas on one of the other chains)

Each NFT is valuable because someone will want to match their NFT to the one you have. The more you have the higher chances you can to either getting matching sets or set the value for sale of your NFT.

WILD CARDS:

The Wild Cards are Blockchain-bound pups that have a small chance of being minted due to their rarity (1%) but they work as a Joker in the Matchmaking of your deck. If you manage to obtain matching pups across 5 blockchains but you have a Wild Card, you don't need the 6th match, because the Wild Card fills that gap.
