

**Women in Science Symposium -GDCH Event on 8<sup>th</sup> May 2023**

*The event is financed by the GDCH, CRC 325 and RTG 2620*

It is a pleasure to announce our “Women in Science Symposium” to highlight leading female scientists in academia and industry (alphabetic order): Dr. Guilia Bergonzini (Astra Zeneca, Gothenburg), Prof. Dr. Ivana Fleischer (University Tübingen), Prof. Dr. Birgit Weber (University Bayreuth) and. This event is thought of as a platform to share and discuss insights in recent research of organic and inorganic chemistry and also career options for upcoming female researchers. To allow for enough time and suitable settings for the different topics to be discussed the symposium has slots for individual meetings with faculty members and especially female PhD students of the coordinate research funds, the public talks (H46, 4 pm c.t.) and an “Get-Together” with food and drinks starting directly after the lectures in CH 12.0.16 to which I, as the GDCH host, cordially invite especially the female PhD students and faculty members of the Pharmacy and Chemistry.

Very much looking forward to meeting all of you in H46 at 4:15 pm on 8<sup>th</sup> May as a kick-off into summer term 2023!

Best regards,

Prof. Dr. Julia Rehbein
