

Make a toilet paper roll submarine

You will need:

- ★ 2 toilet paper roll tubes
- ★ 2 sheets of colored paper (different colors)
- ★ scissors
- ★ glue stick
- ★ sticky tape
- ★ tissue
- ★ drinking straw

What to do:

1. Cut one of your toilet paper roll tubes in half, and wrap it in colored paper. Use the glue stick to fix the paper to the tube.
2. Cover the other tube with the other colored sheet of paper, and glue the paper down. Cut two big holes out of the side to be portholes.
3. Use the bottom of the half-tube to draw a circle in the top of the longer tube. Cut the circle out.
4. Push the half-tube down into the hole in the longer tube, so it sticks up like a funnel.
5. Make a sausage shape out of tissue (it should be a little longer than the long tube, but the right size to fit inside). Wrap your sausage shape in the same color paper as the funnel. Then push it inside the long tube so a little bit sticks out at either end.
6. Cut a propeller shape out of the same color paper as the long tube, and stick it on to one end.
7. Tape a drinking straw inside the funnel to be a periscope.
8. Your submarine is finished! If you want, you can decorate it by drawing some passengers in the portholes.
