

Department: Computer Engineering

Event Heading: Java Applet Workshop

Date: 21/08/2019

Section: ACM Events

Content:

ACM had organized a Workshop on Java Applet on 21th Aug 2019. This Workshop was organized to help develop the understanding of the students in java applet. An applet is a Java class that extends the java.applet.Applet class. A Java Virtual Machine is required to view an applet. The JVM can be either a plug-in of the Web browser or a separate runtime environment.

This workshop will be a colossal opportunity for the Students of Second year since it is a part of their current Syllabus. This will also help them get a better understanding and enhance their skills and interest in making their mini project.

The Workshop was conducted by Jordan Dsouza, Arjun Chavan and Soham Shinde. First, the workshop started with an introduction to java applet students were given example projects and notes for further refrence. Towards the end of the workshop, the students were shown the java applet mini projects of the previous years . In total 48 students attended this workshop.
