

UPGRADES + ENHANCEMENTS

CONSULTING

Would you like advice on how to optimally operate, maintain or expand your machinery? Or are you planning a new production facility and want to include Komax expertise at the planning stage? Then our Service Consulting is an interesting service for you!

Your requirements

- Inventory of the conditions around your Komax machine park
- High requirements in terms of quality, performance, and availability
- Need for consulting at technological and organizational level

Your benefit

- Accurate inventory with precise recommendation for action
- Perfect configuration of your Komax machines
- Optimized performance of machines and operators
- Higher efficiency in machine service

Description

Our Service Consulting provides you with well-founded answers to your questions about the operation and maintenance of Komax machines. On your behalf, we analyze the situation, conduct a holistic inventory of the conditions surrounding your Komax machinery, and also take into account the personnel resources available. On this basis, we make a recommendation on the machinery and develop a service concept for you that enables efficient and cost-effective maintenance of your machines.

Scope of services

- Requirement analysis
- Machinery inventory
- Analysis of processes
- Recommendation for equipment and configuration of the machines
- Service concept incl. cost-efficient spare parts management
- Benefit analysis
- Further recommendations for action
