

CERTIFIED TRAININGS

KOMAX ON.LINE TRAINING

Are you looking for a simple way to train your employees optimally in the use and maintenance of our machines and test systems? The Komax Academy offers special On.Line Training options for your equipment.

Your requirements

- Prepare new employees for their tasks in a quick, efficient and focused manner
- Employees must be able to perform their work to specifications
- Outsource the training of employees
- Increase your productivity
- Greater security and reliability in production
- Achieve maximum quality consistently

The benefit to you

- Well-trained employees who know what they're doing
- Fewer breakdowns due to human error or improper maintenance
- Less internal training necessary
- Simple, flexible training with 24/7 availability
- Personalized certification

Description

The Komax Academy offers a wide range of courses for operators, maintenance personnel, shift supervisors and quality control staff. We also offer courses on the fundamentals of wire processing that are designed especially for employees without prior knowledge. Courses generally encompass 20 to 30 interactive pages and can be completed in about 30 minutes. When successfully completed, participants receive a certificate from the Komax Academy.

The web-based Komax On.Line Training courses are available around the clock and can be done on any computer or tablet with internet access. Course participants can thus decide when and where they want to learn – and you as the employer can simply set a deadline by which the training has to be completed.

Scope of services

- The courses all have the following chapters:
 - Introduction and explanation of the machine
 - Proper operation
 - Maintenance
 - Troubleshooting
 - Tips and tricks
 - Test with certificate from the Komax Academy
- Separate access per training unit and employee (validity: 12 or 24 months; in this period, the employee can repeat the course or use it as documentation or instructions as often as desired)

Availability

Languages: German, English, Chinese, Spanish; other languages on request
