

Make a toilet roll submarine

You will need:

- ★ 2 toilet roll tubes
- ★ 2 sheets of coloured paper (different colours)
- ★ scissors
- ★ glue stick
- ★ sticky tape
- ★ tissue paper
- ★ drinking straw

What to do:

- 1.** Cut one of your toilet roll tubes in half, and wrap it in coloured paper. Use the glue stick to fix the paper to the tube.
- 2.** Cover the other tube with the other coloured sheet of paper, and glue the paper down. Cut two big holes out of the side to be portholes.
- 3.** Use the bottom of the half-tube to draw a circle in the top of the longer tube. Cut the circle out.
- 4.** Push the half-tube down into the hole in the longer tube, so it sticks up like a funnel.
- 5.** Make a sausage shape out of tissue paper (it should be a bit longer than the long tube, but the right size to fit inside). Wrap your sausage shape in the same colour paper as the funnel. Then push it inside the long tube so a bit sticks out at either end.
- 6.** Cut a propeller shape out of the same colour paper as the long tube, and stick it on to one end.
- 7.** Tape a drinking straw inside the funnel to be a periscope.
- 8.** Your submarine is finished! If you like, you can decorate it by drawing some passengers in the portholes.
