

DON BOSCO INSTITUTE OF TECHNOLOGY

Premier Automobiles Road, Kurla West, Mumbai - 400070

Department of Computer Engineering

Report on – Arduino Workshop

Title: Report on Arduino Workshop

Date: 28th March 2024

Time: 3pm to 5pm

Venue: Computer Center

Target Audience: SE Comps

No. of Participants Present: 28

Resource Person: Mr. Yashas Khot

Organization of Resource Person: ACM student chapter

Organizing Department / Committee / Authority: ACM Student Chapter

Faculty Coordinator: Ms. Sejal Chopra

Objectives:

- ❖ To introduce the students to what Microcontroller boards are by using Arduino Uno.
- ❖ Explain the students what Arduino Uno is and how it is implemented.
- ❖ To give the students an experience of working with Arduino Uno by a hands on session.

Outcomes:

- ❖ The students will gain experience of working with on a microcontroller board.
- ❖ The students will have a hands on experience of working with Arduino Uno to work with mini project.
- ❖ By working with Arduino Uno the students will have the knowledge of how microcontroller boards work and how to use them in projects.

Detailed Report:

The ACM student chapter at Don Bosco Institute of Technology organized an informative hands-on session on Arduino on Thursday, March 28, 2024, from 3pm to 5pm at the Computer Center of the Computer Department. This session was attended by SE students from the Computer Department.

The speaker for the Hands-on workshop was Ms. Sasha Rebello, the Event Advisor of ACM-DBIT. The session commenced promptly at 3 pm, with Ms. Sasha delivering a comprehensive briefing to the students on microcontroller boards, particularly focusing on the Arduino Uno model. During the presentation, Ms. Sasha elucidated the intricacies involved in the construction and configuration of microcontroller boards, providing the students with a detailed understanding of the components integrated into these boards. Additionally, she showcased a variety of microcontroller boards to underscore the diversity within the field. Ms. Sasha further expounded on the practical applications of Arduino across various sectors, illustrating its integration into a multitude of electronic projects. Following the theoretical segment, the students were organized into groups comprising 4-5 individuals, each group being equipped with an Arduino Uno kit along with requisite accessories such as wires, LEDs, buzzers, potentiometers, breadboards, and resistors to facilitate hands-on demonstrations. To ensure seamless participation, each group was assigned a mentor who provided guidance throughout the session. Prior to engaging in the practical exercises, both the mentors and Ms. Sasha assisted the students in installing the Arduino Integrated Development Environment (IDE) software on their personal laptops, a requisite tool for programming the Arduino board. Moreover, the students were furnished with the necessary code for conducting the experiments on their Arduino kits. The initial project demonstrated involved the simple task of blinking the LED on the Arduino Uno board, wherein the students were guided through the process of uploading the provided code onto the board and comprehensively understanding its functionality. Subsequently, the attendees were instructed to undertake a second experiment involving the utilization of wires and breadboards to achieve a similar LED blinking outcome. The third activity entailed the students employing the provided components to activate the buzzer, further enhancing their practical understanding. For final experiment the students were introduced to a more intricate experiment involving a potentiometer, wherein they learned to manipulate analog signals. Throughout the session, the students were encouraged to actively engage with the mentors, seeking clarification on any aspects of the hands-on exercises.

The workshop culminated on a positive note at 5 pm, under the adept guidance of Ms. Sasha Rebello, alongside the designated mentors, yielded invaluable practical insights into the domain of microcontroller boards and Arduino. This educational endeavor facilitated a conducive environment for experiential learning and inquiry among the students.
