

Common Ground

The online platform for record sellers

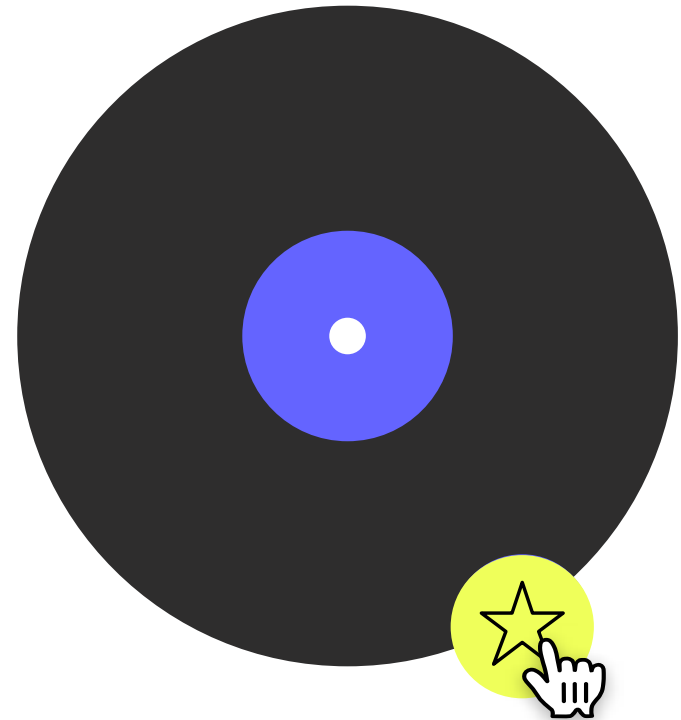

Common Ground is the online platform for record sellers: create retail transactions in seconds with barcode or catalogue searches and keep inventory up to date with Discogs listings.

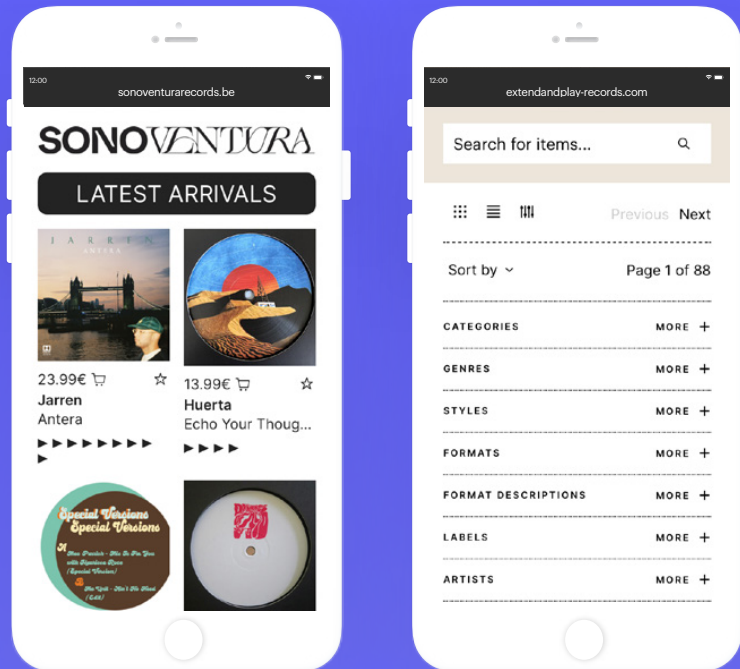

We provide built-in services for inventory management, online sales, newsletter, customers messaging, record sleeve sticker printing and many more.

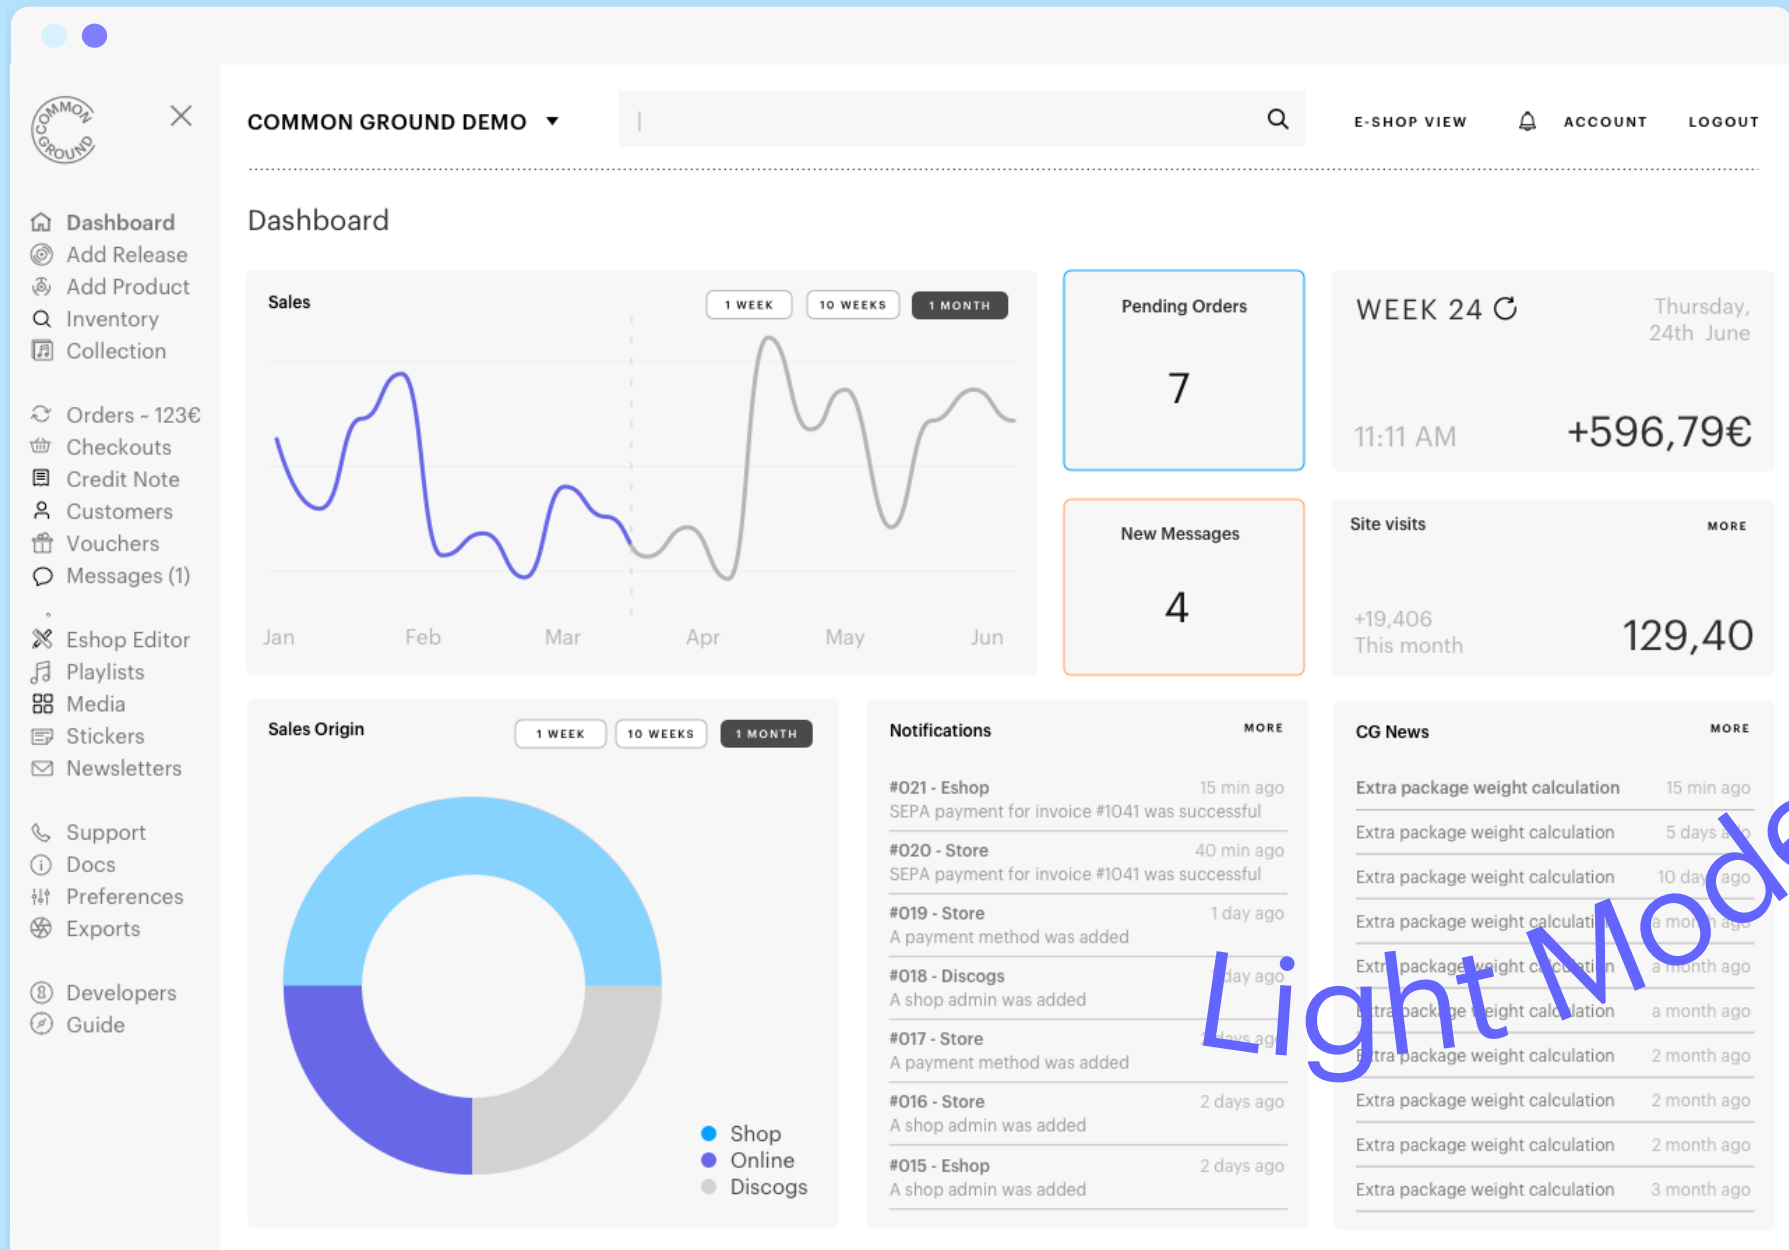

Putting our design and engineering capabilities together at Common Ground, we have created a tool enabling shops to import their whole online inventory through a dedicated Eshop.

Setting up an Eshop using our platform will optimise your online catalogue while generating more sales by offering the “click and collect” option to your customers or by adding audio snippets to your items.

New year, new features

2021 was a big one for us. We were happy to welcome new members to our growing community and adapt and overcome challenges presented by COVID. With your help, Common Ground has become a destination for music lovers and the trusted platform for record sellers around the world.

A safe new season

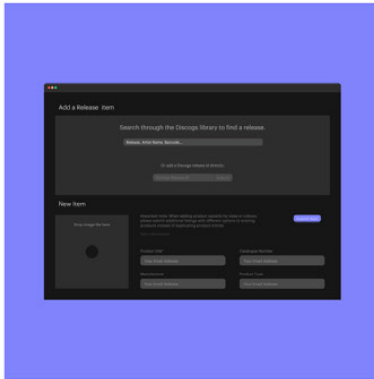

We've been working hard all summer long to provide with new essential features: an improved Eshop checkout, clearer documentation and useful editorial tools for articles.

A new checkout interface

After weeks in the making we're proud to announce a brand new checkout app for your Eshop customers.

Interview with Crevette Records

Crevette Records is now key to the local scene and has undoubtedly become one of Brussels' hotspots for digging. We stopped to have a chat with Pim, the man behind it all.
