

REPAIR + PARTS SERVICES

SPARE PARTS

Spare parts are intended to replace damaged, worn or missing individual parts and assemblies. Komax offers original spare parts quickly and reliably, so that production downtimes can be kept as short as possible. Take advantage of our delivery capabilities: some 80% of all spare parts are available regionally or locally; for all other parts, we keep you stocked with express deliveries.

Your requirements

- Premium-quality spare parts
- High availability of all spare parts
- Defective machines and test systems should be quickly up and running again.
- Fewer breakdowns
- Avoid or shorten downtimes

Your benefit

- Maximum availability through the use of original parts
- Minimization of unplanned production downtimes
- Short downtimes thanks to high parts availability
- Longer service life of machines and test systems thanks to the delivery spare parts at least 7 years after the discontinuation of production
- Fastest possible rectification

Description

With original spare parts, you can be sure that they are conform to our quality standards – so you can ensure stable production with consistent high quality, lengthen the service life of your machine and reduce the probability of unplanned downtimes. Contact your local Komax service center – in all likelihood, the spare part you need will be in stock and at your location in shortest time.

Scope of services

- Identification of the required spare part
- Express delivery
- Part availability at least 7 years after the end of production by the Komax Group
