

## Make a mason jar twister

### You will need:

- ★ clear, round-sided jar, such as a mason jar
- ★ dish soap
- ★ a few drops of food coloring (or orange / blackcurrant concentrate)
- ★ 1 teaspoon of vinegar or lemon juice

### What to do:

- 1.** Fill your jar with water, leaving about half an inch of space at the top.
- 2.** Add a couple of drops of food coloring (not too much, or the water will be too dark and you won't see the twister properly). If you don't have food coloring, you can use a splash of orange or blackcurrant concentrate.
- 3.** Add a teaspoon of vinegar or lemon juice.
- 4.** Hold the jar upright and swirl it around. Start slowly, then swirl faster and faster until you see a twister start to form inside the jar.
- 5.** See how long you can keep the twister going!
