## **Aaron Latimer to join Syft as Vice President Operations**

Syft Technologies is excited to announce the appointment of Aaron Latimer as Vice President Operations. This is a broad role with responsibility for operational excellence and customer satisfaction across Syft, and functional responsibility for manufacturing, supply chain, and global service operations.

Aaron joins Syft with deep operations leadership experience in innovative Kiwi businesses with global presence. Most recently Aaron has been Global Supply Chain Director at NZX and ASX -listed technology company EROAD. Prior to that, Aaron was Global Operations Director in NZX listed Methven for over 5 years where he led significant improvements in efficiency, quality and safety on the path to the successful acquisition of Methven by AU-based GWA. Aaron built his early career across a number of industries, including medical devices and Telco, that are technical with exacting quality standards.

Syft CEO, Alex Fala, comments "We are delighted to welcome Aaron to the Syft team. Aaron deeply understands operations and global markets. He knows how to develop people and systems as companies go through different phases of growth – especially the scale up phase that Syft is in. And he'll add a broad set of perspectives to the overall leadership of the company as a member of the executive team. It's an exciting step for us to bring on a leader of his calibre."

Aaron Latimer commented, "Syft is one of New Zealand's most promising technology companies, with a huge market opportunity and some big strengths. I'm looking forward to getting to know the people, getting my hands dirty with the product, and positively contributing towards making Syft a truly world-beating company."

Aaron will start in his new role on 1 November 2021.
