# General Offsite Tagging Guidelines

## TAGGING TIPS

- **First Thing's First: KPM will send you bannerized URLs:** These will help you build out tags once structure is aligned on.
- **Ideal Structure: 1 Placement per Banner (Store Name):** KPM recommends that our clients build out one placement (impression + click tracker) per Kroger Banner and track all campaign activity under those placements. From there, KPM can provide additional data around ad size, creative version and audience performance.
- **Tag Tampering: Send Tags as is:** Don't edit or copy tags. Download these tags directly from your ad server and send them to us in that format.
- **Verification Access & Blueprints are essential prior to launch:** KPM values your brand's suitability parameters. In order to ensure our media is following your specific guidelines, we need access to your verification platform in order to optimize but also to ensure we are mirroring your preferences within our DSP. For example, granting us access to DV Pinnacle in addition to Blueprint PDFs will let us activate your settings quicker and from the start.

### ACCEPTED TAGS

- ✓ **Tracking Tags**  
< 200 1x1s | < 50 Click
- ✓ **Verification Tags:** Monitoring or Blocking (based on channel)
- ✓ **3<sup>rd</sup> party measurement** studies like Millward Brown
- ✗ **3<sup>rd</sup> Party creative** serving tags
- ✗ **Onsite products** (email, push, PromotelQ, etc.)

# Offsite Ad Server Tagging

For the following ad server workflows, KPM can accommodate a combination of tag granularities, but the maximum accepted click trackers are dependent on channel. **Please refer to channel-specific guides for those caps.** Note that we do not accept 3<sup>rd</sup> party creative ad tags.

# Offsite Verification Tagging

Please reach out to KPM if your verification partner is not included below. We will set up time to talk through work arounds and scoping an additional vendor. Please ensure tags stay under 200 event tags. KPM values your brand's suitability parameters. In order to ensure our media is following your specific guidelines, we need access to your verification platform in order to optimize but also to ensure we are mirroring your preferences within our platforms. For example, granting us access to DV Pinnacle in addition to Blueprint PDFs let us active your settings quicker and from the start.

Nielsen DAR		

- Quick Channel FAQs:**
- Click Tracker Limit:** 50; 11 of those 50 must be by banner as each location has a different URL.
  - Blocking & Monitoring VerificationTags Accepted**
  - Multi-Supplier Campaigns:** Impression 1x1s only (unable to apply multiple client click trackers to a single placement.)
  - MOAT Access:** Advertisers can avoid verification fees if utilizing KPM MOAT access.
  - Brand Safety:** Please provide DV Blueprints (preferred), block lists, allow lists, negative keyword lists with detailed application instructions with your verification tags. This will prevent a high number of brand safety fails during the campaign.

### Quick Channel FAQs:

- Click Trackers Only:** Facebook currently does not allow for impression trackers to be provided on custom audiences.
- KPM Campaign Structure:** If you'd like to align your click trackers to campaign structure, we break out ad sets out by banner location and audience.
- Multi-Supplier:** Tags are not accepted for multi-supplier campaigns due to limitations with implementation technology. Please reach out to KPM for more info.
- Timing:** Please provide tags 10 days prior to campaign launch for QA.
- Kantar Millward Brown Study:** In order to activate, funding needs to be above \$170k.
- 1 Tag per unit:** you are only able to provide 1 type of tag per ad. For example, one single campaign Facebook cannot implement a Nielsen DAR tag and a Millward Brown Tag.
- Client Tag-Less integrations:** We are not able to provide campaign IDs based on our account setup to be tracked in client's instances of MOAT or DV.

# Advanced TV

AD SERVING	Accepted Partners	Accepted Tag Type(s)	Steps to Activate
	Google Campaign Manager (DCM)	<b>Click &amp; Impression Trackers</b> <ul style="list-style-type: none"> <li>Up to 50 click trackers</li> </ul>	<ol style="list-style-type: none"> <li>KPM will send bannerized URLs.</li> <li>Advertiser will build their tags within approved ad server partners. Flashtalking &amp; Extreme Reach tags should use KPM as the site/publisher in tag setup. Ensure that your brief uses "Roku + KPM" and not one or the other.</li> <li>Advertiser sends KPM tags</li> <li>Roku will QA and implement tags</li> <li>Advertiser notifies KPM if data isn't flowing after 72 hrs who will work with Roku to troubleshoot.</li> </ol>
	Flashtalking		
	Extreme Reach		
	Innovid		

## Quick Channel FAQs:

- **KPM doesn't build within Roku.** The advertiser can work directly with Roku on tags and specs. KPM does have some data privacy restrictions forbidding the use of certain ad serving tags.
- **Roku + KPM:** This is already loaded into Flashtalking as a selectable site so no custom adds are needed.

OTHER	Accepted Partners	Steps to Activate
	Nielsen DAR	<ol style="list-style-type: none"> <li>Advertiser to send tags to Roku 10 days prior to activation</li> <li>Roku to QA tags and append to campaigns.</li> </ol>

VERIFICATION	Accepted Partners	Steps to Activate
	MOAT	Because KPM doesn't manage the build directly, please work with the provided KPM rep upon kickoff to understand verification restrictions and specs.
