WHY DOES YOUR BUSINESS NEED A PASSWORD MANAGER?

4 out of 5 hacks are caused by weak, reused, or stolen employee passwords.

\$4.8 M

is the average cost of a breach caused by stolen or compromised credentials — the most expensive cause of data breaches.

70%

of company employees reuse the same password

16%

is the rate at which phishing and social engineering attacks are growing year over year

60%

of small and medium-sized businesses that are hacked go out of business within 6 months

THAT'S WHERE DASHLANE COMES IN

Dashlane is a password management solution that is as easy to use as it is secure. In our 10-year history, Dashlane has never been hacked.

Admins can easily onboard, offboard, and manage their employees with the assurance that company data is safe. And employees can enjoy a way to manage their work and personal accounts that's already loved by millions.

DASHLANE’S PASSWORD MANAGEMENT SOLUTIONS

Dashlane's business plans are the easiest way for you to manage your team — and for employees to securely store passwords and personal info. All without disrupting your business.

DASHLANE’S BUSINESS PLANS:

TEAM

Dashlane Team is the simple way to manage passwords and improve online security.

KEY FEATURES:

- ✓ U.S.-patented security architecture
- ✓ Security dashboard
- ✓ Policy management
- ✓ Directory integration
- ✓ Group sharing
- ✓ Two-factor authentication

BUSINESS

Dashlane Business offers advanced password management and authentication features, including single sign-on integration.

ALL TEAM FEATURES PLUS:

- ✓ SAML-based single sign-on (SSO)
- ✓ Free family plan for every seat (\$90 annual value)

DASHLANE ALSO OFFERS PLANS FOR INDIVIDUALS AND FAMILIES:

FREE	PREMIUM	PREMIUM PLUS (US ONLY)	PREMIUM FAMILY	PREMIUM PLUS FAMILY (US ONLY)
Up to 50 passwords on one device	Unlimited passwords on unlimited devices, plus additional security features	Identity theft monitoring and insurance	Up to 6 individual Premium accounts managed under one subscription	Up to 6 individual Premium Plus accounts managed under one subscription

THE FEATURES YOU AND YOUR EMPLOYEES WILL LOVE

U.S.-PATENTED SECURITY ARCHITECTURE

Dashlane uses a patented security architecture and AES 256-bit encryption to keep your info safe.

ADMIN CONSOLE

Onboard new team members, manage permissions, and monitor security issues all from the Admin Console. Ultimate control, all in one place.

SECURITY DASHBOARD

Give employees a centralized source for breach alerts and visibility into password health, making it easy to fix vulnerabilities quickly.

ADVANCED REPORTING

Dashlane is the only password manager with reporting that tracks password improvement over time. Receive actionable insights and see the impact of your security measures.

GROUP SHARING

Securely share encrypted passwords with individuals or groups — and say goodbye to passwords sent unsecurely over email or Slack.

TWO-FACTOR AUTHENTICATION (2FA)

Two-factor authentication is built in to Dashlane by design, and we're compatible with your favorite mobile authenticator apps or U2F keys.

SINGLE SIGN-ON

Logging in has never been safer or easier. SSO is easy to install and makes managing your employees with Dashlane even more efficient. (Only available on Dashlane Business.)

20,000 COMPANIES USE AND LOVE DASHLANE

Don't just take our word for it.

“Dashlane’s app is so easy to use, we felt that anyone could get in there and figure it out in a few seconds. Now our security is light years ahead of where we were before.”

— Ryan,
Help Desk Technician at a U.S. Bank

ABOUT US

Dashlane offers businesses a password management solution that is as easy to use as it is secure. Admins can easily onboard, offboard, and manage their employees with the assurance that company data is safe. And employees can enjoy a way to manage their work and personal accounts that's already loved by millions.

Our team in Paris, New York, and Lisbon is united by our passion for improving the digital experience and the belief that with the right tools, we can help everyone realize the promise of the internet. Dashlane has empowered over 15 million users and over 20,000 companies in 180 countries to dash across the internet without compromising on security.
