Summary

Fullstack Engineer with experience building apps from scratch. I have been working remotely in the last year, focused on React, Nest.js, Redux, TypeScript, and Node.

- Developed complex interfaces for games using React such as an inventory system, a bank system, among others to be completed.
- Got involved in the technical decision-making process providing suggestions that resulted in a better UX.

Experience

Fullstack Developer

Cidade Alta

March 2023 - Present

Skills: ReactJS · TypeScript · JavaScript · C#

Development and maintenance of interfaces using React, in addition to developing and refactoring scripts using TypeScript and C#.

Frontend Developer

Cidade Alta

March 2022 - March 2023

Development and maintenance of interfaces and scripts using React, Vite, Typescript, Redux, Styled Components, Node and Figma. For planning the sprints, Azure DevOps is used. Some highlights:

- Creation from scratch of a fictitious banking system used within the game's servers.
- Participating in the planning and development of a new game mode for Cidade Alta (Battle Royale). I worked on this project as a Fullstack using Vite, TypeScript, Nest.JS and Prisma.

Skills

React · Redux · Typescript · Styled Components · Node · SQL · Prisma · NestJS
