What are the risks of investing?

Risk indicator for the Moderate Fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way. To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at generatewealth.co.nz/survey. Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the last five years². While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

Notes

1. The Manager takes a broad view of what constitutes infrastructure assets. See the SIPO for further information.
2. As the funds' investment policy has changed significantly and its returns before the change would not reflect its current investment policy, with the effect from 16 May 2022, a combination of market index returns and the fund's actual returns have been used to complete the risk indicator. Actual returns have been used from 16 May 2022 to the end of the period to which this fund update relates. For all relevant periods prior to 16 May 2022 market index returns have been used in order to construct a total 5 years of returns on which to base the risk indicator. As a result the risk indicator may provide a less reliable indicator of the potential future volatility of the fund.
3. Membership fees are the monthly fixed dollar charges for membership in the Generate KiwiSaver Scheme. You will pay only \$3 each month even if you are invested in multiple funds within the Generate KiwiSaver Scheme.
4. International equities are made up of directly held equity investments.
5. 'Cash and cash equivalents' includes the value of foreign exchange hedging derivatives related to the fund's off-shore investments.
6. Listed property includes investments in aged care companies.
7. The Fund has an ability to invest in unlisted property and infrastructure investments as per limits set in the SIPO.
8. Australasian equities includes an investment in unlisted New Zealand equities.
