Department: Computer Engineering

Event Heading: Code it Out

Date : 26/07/2018

Section : ACM Events

Content :

The Code it Out competition was organized by the ACM Technical Team and held on 26th July 2018.

The purpose of the competition was to make students evaluate their technical aptitude through a competitive environment and also give them an idea of how actual competitive programming events occur. Every participant was given a separate PC with the proper setup(i.e. browser , compiler and text editor). They were seated in alternate PCs and were deprived of internet access to avoid malpractices. The questions of the competition were compiled into an easily accessible website which was hosted locally and was accessed through the LAN using the local server's IP address.

A total of 3 students were able to solve at least one problem out of the 4 given problems with the highest no. of problems solved being 4 The competition was a good learning experience for the students. A total of 19 students attended the workshop.
