

Sealers

Concrete Solutions

WHY USE A CONCRETE SEALER?

Concrete is a cost-effective and durable material, however over time it's susceptible to water damage, staining, and corrosion, leading to potential structural problems and safety concerns. For added protection, sealing is a recommended step to prolong the life of your concrete.

Elastochem has reliable and long-lasting products for sealing and protecting concrete surfaces such as driveways, pool decks, or basement floors.

Acrylic Concrete Sealer

Easy to apply, and can be used on both interior and exterior surfaces.

ACS Series - Acrylic Concrete Sealers

A solvent based high molecular weight, acrylic solution, available in 5%, 10%, 15%, 20%, and 25% solids. High gloss and non-slip versions available.

Properties: This sealer is non-yellowing, fast drying, and has excellent water and chemical resistance. Glossy, colour-enhancing sheen.

CS100 - Concrete Cure & Seal

A water based acrylic emulsion.

Properties: This sealer is non-yellowing, fast drying and has excellent chemical resistance. Low gloss to matte finish.

Siloxane Concrete Sealer

Offers water repellency by creating a durable barrier against moisture and liquid absorption

SIL 20 & SIL 40 - Siloxane Water Repellents

Poly-siloxane water repellents, available in 20% and 40% solids.

Properties: This sealer is non-staining, clear drying coating with excellent water resistance.
