

Welcome to Dashlane Team

Available on all devices and platforms, Dashlane is an app for storing and autofilling passwords, passkeys, and other sensitive data easily and securely. Log in instantly, fly through forms, and breeze through checkout on every device—at the office, at home, and anywhere else you work.

What do I get with Dashlane?

Credential management

Dashlane remembers all your passwords—so you don't have to. Plus, Dashlane's Password Generator automatically creates and saves complex, randomized passwords for you.

Unlimited devices

Easily log in on any device or platform. Dashlane securely syncs your logins to all your authenticated devices, including Mac, Windows, Linux, Chromebook, iOS, and Android.

Secure sharing

Need to share or store sensitive information? With Secure Notes, you can safely share information with other Dashlane members.

Real-time phishing alerts

Phishing is one of the top causes of data breaches. Our real-time alerts warn you if you copy your credentials from the extension pop-up and try to paste them somewhere that looks suspicious or doesn't match our records.

Dark Web Monitoring

Get real-time alerts in the web app when your information is involved in a data leak on the dark web, plus recommended actions for how to remediate the threat.

Password Health score

Dashlane calculates your Password Health score to give you visibility into your password health, show you which passwords are reused, weak, or compromised, and make it easy to fix vulnerabilities quickly.

Anything else I should know?

Memorize your Master Password

It's the only password you need to remember now! Your Master Password is the encryption key to unlock your data. It should be hard to guess but easy to remember and, most importantly, never used before. Dashlane doesn't store your Master Password anywhere, so only you can access your information.

Service & support

We all need a little support sometimes, and with Dashlane Team, you skip to the front of the line. Reach out to our Customer Support team for your velvet-rope treatment through live chat or by email at support@dashlane.com.

Visit support.dashlane.com for more information about getting started.
