

Strengthening the sector: Windar Renovables joins the Offshore Wind Foundations Alliance as its newest member

15 May 2025 Brussels, Belgium. The Offshore Wind Foundations Alliance (OWFA) is thrilled to announce that it has welcomed Windar Renovables as its newest member, expanding the alliance to seven members. This addition reinforces OWFA's commitment to promote and protect the EU wind energy sector through policy.

OWFA has been a champion of the European offshore wind foundations industry since its establishment in 2021 and has consistently advocated for its support before EU policymakers. With Windar joining the alliance, OWFA strengthens its position in supporting the European foundations industry and highlighting the need for policies that not only support its survival but also stimulate growth in this sector.

"We are excited for this new chapter and look forward to working with other wind industry leaders, sharing ideas and expertise. We believe offshore wind energy stands as a proven and vital component in Europe's path towards net zero, and European foundation manufacturers provide a crucial part of the wind supply chain. We view OWFA as a vital platform through which the industry can collectively voice its interests and ensure that the EU can safely reach its environmental targets." – **Orlando Alonso Villarón, Executive Chairman and CEO of Windar**

"The addition of Windar to our membership marks an important milestone in our work and is indicative of the sector's need for robust support. OWFA now represents nearly all the EU manufacturers of offshore wind foundations, contributing to approximately 300 project and 44,00MW of energy. With Windar on board, our voice is even stronger as we advocate for policies that promote and protect European industry." – **OWFA**

About OWFA

The Offshore Wind Foundations Alliance (OWFA) is a coalition of seven European producers offshore wind turbine foundations: CS Wind Offshore (Denmark), EEW Special Pipe Constructions GmbH (Germany), SIF Netherlands BV (the Netherlands), Smulders Projects (Belgium), Steelwind Nordenham GmbH (Germany), Haizea Wind Group (Spain), and Windar Renovables (Spain).

OWFA members have already produced more than 11,000 monopiles and transition pieces, carried out approximately 300 projects producing around 44,000 MW of energy, and collectively employ almost 7,000 workers, making them a critical part of the European offshore wind sector and energy transition.

OWFA supports the offshore foundations industry by raising their voice at EU-level, calling for a level playing field to strengthen the offshore wind supply chain. Ultimately, we seek to create a fair, green and safe European offshore wind landscape.
