The date the fund started	16 April 2013

### What are the risks of investing?

#### Risk indicator for the Focused Growth Fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way. To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [generatewealth.co.nz/survey](https://generatewealth.co.nz/survey). Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the last five years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

## Fund Update for the Generate KiwiSaver Scheme: Focused Growth Fund 31 March 2024

### How has the fund performed?

	5 year p.a.	Past year
Annual return (after deductions for charges and tax)	8.79%	24.69%
Annual return (after deductions for charges but before tax)	9.46%	25.45%
Market index annual return (reflects no deduction for charges and tax)	10.20%	19.31%

The market index return reflects a composite of benchmark index returns, weighted for the fund's target asset allocation, being the fund's relevant benchmark since inception. All of the share market benchmark indices used include dividends but do not include imputation credits.

Additional information about the market index is available in the SIPO on the register at [disclose-register.companiesoffice.govt.nz](https://disclose-register.companiesoffice.govt.nz).

### Annual return graph

This shows the return after fund charges and tax for each of the 10 year endings 31 March. The last bar shows the average annual return for the last 10 years, up to 31 March 2024.

**Important:** This does not tell you how the fund will perform in the future. Returns in this graph are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower. Benchmark returns in the graph are before the deduction of tax.

### What fees are investors charged?

Investors in the Focused Growth Fund are charged fund charges. In the year to 31 March 2024 these were:

	% of net asset value
<b>Total fund charges</b>	1.31%
Which are made up of:	
Total management and administration charges including:	
Manager's basic fee	1.16%
Other management and administration charges <sup>1</sup>	0.15%
Total performance based fees	0.00%
<b>Other charges</b>	\$ amount per investor
Membership Fee <sup>2</sup>	\$36.00 per year

A portion of the 'other management and administration charges' relate to management, performance and administration charges from investments in underlying funds. Some of these calculations are based on estimates.

Investors are not currently charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for more information about fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

### Example of how this applies to an investor

Hannah had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Hannah received a return after fund charges were deducted of \$2,469 (that is 24.69% of her initial \$10,000). Hannah also paid \$36 in other charges. This gives Hannah a total return after tax of \$2,433 for the year.
