EXPERIENCE

TATA CONSULTANCY SERVICES (TCS) · Software Developer

Apr 2023 - present

- Worked on the development of critical features of an Insurance application using **JavaScript, React, Redux**, and custom project-specific libraries.
- Developed UI for a critical feature page consisting of multiple forms with data validation and logic as per project requirements. Integrated Redux reducers to enhance state management and optimize overall performance.
- Collaborated with the back-end team to integrate data from **API** to user-facing elements and trigger back-end services on user events.
- Performed unit testing using **Jest** and React Testing Library, achieving a comprehensive **100%** code coverage.
- Enhanced code quality by identifying and fixing bugs and diligently analyzed and resolved security vulnerabilities.
- Worked on the development of supply chain dashboard using **Next.js, Tailwind CSS**, and Material UI.
- Built several components with advanced features, such as efficient filtering, sorting, and pagination.

INFOSYS · Software Engineer

Nov 2020 - Mar 2023

- Developed a web application using **Python, Flask, React**, and **Selenium** where users can search & fetch deployed API data from the server and then transform it into a visual format, reducing the manual effort of **1-2 hours**.
- Created **40+** web automation scripts using Python and **Selenium** which reduced the effort of manual testing to **70%**.
- Developed various Python **utility** modules such as custom email reporting, data encoding/decoding, and storing results of automated sanity checks into the Microsoft SQL Server database.
- Automated incident creation process using ServiceNow API. Upon sanity check failure, an incident is auto-generated in ServiceNow, triggering email alerts to the respective team.
