

Light Carafe

Care & Use Guide

Sonnenglas®

Social Impact by Design. Proudly Made in Africa.

Drinking & Lighting in One. Solar Powered.

Sonnenglas® Light Carafe is a drinking carafe that doubles as a table lamp when paired with Sonnenglas SOMO Solar Light. Illuminate your home, indoors or outdoors, and add style to dinner table settings, garden gatherings, or parties.

The Light Carafe is handmade from 100% recycled bottles, collected by people in Eswatini, a small African country. For many, collecting bottles is their sole source of income.

Handling Instructions

- Wash before first use.
- Dishwasher safe at a low temperature (max 45°C, using the glass program). Hand washing is recommended.
- Always wash without the SOMO module or cork stopper.
- Do not use in a microwave or freezer.
- Suitable for cold to room temperature liquids only. Avoid using for hot beverages and avoid temperature shocks.
- Regularly inspect the carafe and discontinue use if the glass is cracked.

Care Instructions

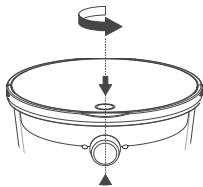

- If storing in the fridge, use the provided cork stopper. Do not place the SOMO solar light in the fridge.
- Remove the SOMO solar light before pouring drinks.
- Do not overfill the carafe. Ensure that the cork stopper and the SOMO solar light do not come into contact with any beverage.

This Light Carafe is compatible with **Sonnenglas® SOMO Gen6 Modul**.
Model M = for SOMO Mini · **Model C** = for SOMO Classic.

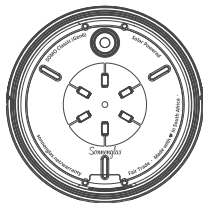

How to use

Use the Solar Light as a cover to provide light and to protect your drinks from insects and dust.

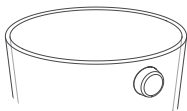

ON/OFF: Rotate Solar Light
(align dots to turn on)

Remove to
pour drink

↓ **SOMO** Solar Light

Includes Cork Stopper for use without SOMO
