## WORK EXPERIENCE

### Frontend Engineer, Unit One Group

Jan 2023 - Present

Unit One Group is a software Development, R&D Extension, QA Automation, Full Stack Project Development, Data entry Services.

- Created user-friendly web pages, and used frontend frameworks like (React.js, Next.js)
- Design mobile-based features.

### Full-Stack Developer, EduReach

June 2022 - Jan 2023

EduReach e-Learning is an online marketplace and platform for teaching Arabic to non-native speakers with qualified instructors.

- I built a REST API with PHP/Laravel and a Nodejs backend.
- I developed a solution for video chatting and phoning.
- Create a landing page, teacher dashboard, and admin dashboard utilizing the React technology as a front-end developer.

### Full-Stack Developer, Internship for Google for Startups

June 2022 - Nov 2022

- I created a REST API with a Nodejs backend, documentation for developers to connect with, and numerous dashboards.
- Design and Architecture of the main Database schema for the project.
- React Front-end developer, build an admin dashboard using React technology.
- Flexible and works with a team.
- I planned for projects and wrote Sprint Planning for the projects.

### Front End Web Developer, Freelancer

Jun 2020 - May 2022

- Created user-friendly web pages, and used frontend frameworks like (React, and Vue)
- Maintain and improve the website.
- Optimized applications for maximum speed.
- Design mobile-based features.
- Collaborated with back-end developers and web designers to improve the usability and troubleshooting
- I wrote functional requirement documents and guides
- Create quality mockups and prototypes

## EDUCATION

### Bachelor's degree in Computer Engineering, The Islamic University of Gaza

April 2016 - June 2021

## PROFESSIONAL TRAINING

### Gaza Sky Geeks - DevOps and AWS Bootcamp

November 2022

In the 28 hours that I spent studying for the DevOps & AWS course, I learned about Docker, Linux, and AWS services.

### Gaza Sky Geeks - Code Academy

Jan 2022 - Jun 2022

I obtained full-stack web developer training in Node.js, React.js, and presentation development over five months.

### Gaza Sky Geeks - Skylancer Academy

Sep 2020 - Dec 2020

Training to be the best Freelance and how to find jobs.

### Hexa, Co - Full Stack Developer

Apr 2020 - Sep 2020

Tested apps from the company Hexa, wrote a report for bugs, and Advised customers regarding software system maintenance.

## PROJECTS

### Project For University Graduation

[Documentation](#)

- We created this project throughout our fifth year of college to address the issue of controlling devices that don't support more modern technologies like Alexa and others.
- I built the Frontend with VueJs and Vuex, and added support for more than Dark Mode and Light Mod themes. Two languages, after which my team members built the API with NodeJS, a different teammate created an Android app, and a third teammate worked with a Raspberry Pi.

### E-Commerce Projects

- These projects, which deal with a large number of users, were created using Laravel and Livewire Framework and make use of frontend frameworks in addition to creating a control panel, processing payment gates, and allowing users to sign in using social media.

## SKILLS

**Programming technologies:** Experienced in HTML, JavaScript, TypeScript, CSS/SCSS, React Native, NodeJs, Express, React, nest, Laravel,
