

Crafting foam animals

Create your own cheerful winter animals using foam and pipe cleaners! Follow these simple steps to make colourful figures and enjoy hours of creative fun.

1 Download the PDF file using the "Download PDF" button above and print the outlines. Choose the animal you'd like to make.

2 Pick the foam colours you want to use. Place the printed outlines on the foam and trace the shapes firmly with a ballpoint pen.

3 The lines will appear as indents on the foam, which you can go over with your pen. Alternatively, you can cut out the shapes first and then trace their outlines onto the foam.

4 Carefully cut out all the shapes from the foam and assemble your animal figure.

5 Take two pipe cleaners per animal, cut them in half, and wrap them around a pencil to create spirals.

6 Glue the foam shapes together and attach the pipe cleaners as arms and legs. Use craft glue or, if handled carefully, a hot glue gun.

7 Repeat these steps for the other animals, and let the fun begin!
