10

With its special storage systems, the Komax ads 123 can deliver wire gently and quickly. It is a perfect match for the Komax Kappa line.

Function

To achieve optimum wire transport with the Komax ads 123 delivery system, you can vary the storage systems used in order to meet the given situation. The "linear storage system" is an option suitable for smaller wire diameters and high speeds. Thanks to a small angle of grip, the "storage arm down" option can be used to feed rigid conductors and large-diameter wires.

Powerful motors allow reels as heavy as 600kg and with diameters of 1000mm to be de-reeled, clamped and lifted. Excellent safety standards are guaranteed

with the reel housing, rollback lock and side covers. The expanded "Down Plus" option can be used along with "Storage Arm Down". The additional reel allows high-speed delivery.

Your Benefits

- Gentle, continuous and low-strain wire feed
- Excellent cost-benefit ratio
- Adjustable power for storage unit
- Quick and easy wire changes
- Automatic manless production possible
- Full integration in Komax basic machines

Technical data

	«Linear Storage»	«Storage Arm Down»	«Down Plus Option»
Wire diameter	2–18mm	4–35mm	4–18mm
Wire cross section	1–95mm ²	6–120mm ²	6–95mm ²
Speed	2.8m/s*	1m/s*	1.5m/s*
Weight	100kg	76kg	78kg
Compressed air onnection	4–6bar	4–6bar	
High wire runout	950–1200mm	950–1200mm	
Dimensions w×h×d	1140×2490×555mm	1580×1660×300mm	1580×1780×300mm
