

HYBRID COURSE

OVERVIEW

TCVM Diagnostics, Classical Points and Advanced Acupuncture Techniques (approved for 30 hours by AAVSB RACE) is a wet lab workshop offered to veterinary acupuncturists to expand their technical knowledge of acupuncture and to strengthen their TCVM diagnostic skills. Practical clinical application is the ultimate goal of this course; as such, wet labs make up more than half the on-site portion of the course and lectures are comprised of many demos and case studies. This version of the course is offered to equine practitioners.

COURSE FEATURES

- Expand your technical knowledge of acupuncture and to strengthen your TCVM diagnostic skills
- 12 hours of wet labs intensive hands-on learning in each session
- Diagnose and treat real cases with the instructors and fellow veterinary acupuncturists
- Learn from all the wet lab cases with discussion rounds
- Satisfies the internship requirement of CVA certification
