

# Save time. Save money.

## With Clean Energy Navigator

Clean Energy Navigator is a digital tool that uses real-time data to give businesses free personalized insights to **discover ways to save** money, manage energy use more sustainably and reduce time spent on energy bills.

### Understand your bills faster

View why your bill increased or decreased, compare bills across your portfolio and see trends to help you budget and plan.

### See what uses energy

Understand what inside your business uses the most energy and track the impact of your energy improvements over time.

### Free personalized insights help you save

Explore personalized recommended actions you can take to optimize your energy use, increase energy efficiency and save money while maintaining business continuity.

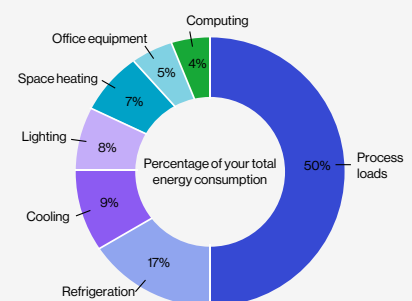

### Simple tool for beginners

Clean Energy Navigator is designed for beginners and energy experts alike to manage their organization's energy use with ease and save time through easy data analysis – at every individual building or site.

Clean Energy Navigator is **free for AES Indiana business customers.**

Sign up for Clean Energy Navigator with your current AES Indiana account and learn more at [aesindiana.com/clean-energy-navigator](https://aesindiana.com/clean-energy-navigator)

### See what uses energy

AES is a global Fortune 500 power company accelerating the future of energy, together.

# Energy Efficiency Solutions

AES Indiana has a variety of programs to help your organization meet your sustainability goals.

Visit [aesindiana.com/your-business](https://aesindiana.com/your-business) to learn more.

## Prescriptive Rebates

Prescriptive rebates can help businesses reduce their payback period on new energy-efficient equipment and projects, including lighting, HVAC and other equipment.

Email [info@aesindianarebates.com](mailto:info@aesindianarebates.com) or call **888-982-7071** to discuss your savings potential.

## Custom Incentives

Custom Incentives are designed for energy efficiency projects and technologies not included in the Prescriptive Rebate program.

Email [custom@aesindianarebates.com](mailto:custom@aesindianarebates.com) or call **888-982-7071** to discuss your savings potential.

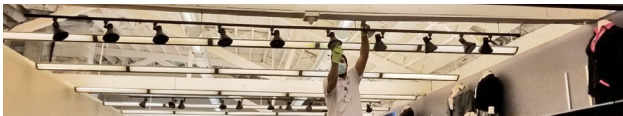

## Green Power

Green power is electricity produced from renewable resources – like the sun, wind, water and more – that do not pollute our environment.

Choose to offset 100%, 50% or 25% of your home energy usage. Business customers also have the option to enroll at the 10% level.

## Retro-Commissioning (RCx)

RCx is a process by which existing building systems are optimized to perform as efficiently and effectively as possible.

Email [AESIndianaretrocx@aes.com](mailto:AESIndianaretrocx@aes.com) or call **317-407-1684** to discuss your savings potential.

## New Construction Incentives

New construction or renovation projects designed to exceed Indiana's state energy code requirements may be eligible for AES Indiana's Custom Incentive program.

Email [custom@aesindianarebates.com](mailto:custom@aesindianarebates.com) or call **888-982-7071** to discuss your savings potential.
