

Magnets

1 On page 7, does the author really think people move things “with their mind”?

Common Core State Standards (Reading: Informational text): RI.2.6

2 What type of materials are magnetic?

Common Core State Standards (Reading: Informational text): RI.2.1

3 What is another word for “alloys” on page 9?

Common Core State Standards (Reading: Informational text): RI.3.4

4 Can you cut off one pole of a magnet?

Common Core State Standards (Reading: Informational text): RI.3.1

5 What happens when you cut a magnet in half?

Common Core State Standards (Reading: Informational text): RI.3.2

6 What is the purpose of the text on page 17?

Common Core State Standards (Reading: Informational text): RI.3.2

7 Which came first: the use of compasses or the invention of the battery?

Common Core State Standards (Reading: Informational text): RI.3.8

8 What is the full name of an MRI machine?

Common Core State Standards (Reading: Informational text): RI.2.1

Answers

- 1 No. The quotation marks show the author thinks this isn't really true.
- 2 metals
- 3 mixtures
- 4 No, it always has two poles.
- 5 You then have two magnets, each with a smaller magnetic field and weaker magnetism.
- 6 to explain how to make a nail into a magnet
- 7 the use of compasses
- 8 a magnetic resonance imaging machine
