Computer Engineering
Report on – TEKNACK'25 IDEATION MEET

Title: *TEKNACK'25 IDEATION MEET*

Date: 1st November 2024

Time: 11:00 a.m. – 5:40 p.m.

Venue: GOOGLE MEET

Target Audience: **S.E., T.E. and B.E**

No. of Participants Present: 104

No. of Girl Participants Present: 40

No. of Boy Participants Present: 64

Resource Person: Mr. Joshua Menezes

Organization of Recourse Person: ACM Student Chapter

Organizing Department / Committee / Authority: ACM Student Chapter,

Faculty Coordinator: Ms. Priya Kaul

Objectives:

- ❖ To inspire participants to think creatively and develop unique game concepts that showcase their originality and problem-solving skills.
- ❖ To offer constructive feedback on game ideas, helping participants understand the feasibility and impact of their concepts.
- ❖ To emphasize the importance of gamification in enhancing player engagement, encouraging teams to incorporate interactive and rewarding elements in their designs.

Outcomes:

- ❖ Participants left with improved game ideas, incorporating the panel's feedback to enhance creativity, technical feasibility, and player experience.
- ❖ Teams gained practical insights into gamification strategies and ways to effectively integrate them into game design, which will help increase user engagement.
- ❖ The meet provided participants with a structured plan and actionable steps for refining and advancing their projects towards development.

Detailed Report:

On 1st of November 2024, ACM DBIT organized an Ideation Meet to advance game development ideas among student teams. The session aimed to encourage innovation and provide expert feedback on concept viability, with a strong emphasis on incorporating gamification. The meet was structured into two batches, each presenting their ideas to distinct panels of reviewers.

The ideation meet was conducted in two batches to accommodate the large number of participating teams, which ranged from Team 1 to Team 44.

Batch 1: Teams 1 to 21 presented in the morning session, starting at 11:00 AM.

Batch 2: Teams 22 to 44 presented in the afternoon session, starting at 1:30 PM.

Each team prepared three unique game concepts and one gamification idea to showcase before the panel. Additionally, teams were encouraged to focus gamification elements, aiming to increase engagement and player experience.

The panels, each composed of distinguished members with expertise in game design and technical innovation, provided valuable feedback and recommendations on the feasibility, creativity, and potential impact of each presented idea.

Panel 1 (Morning Session): Included Nathan Pimenta, Sahil Singh, Suyash Kadam, Figo Fernandes, and Andre Fernandes.

Panel 2 (Afternoon Session): Included Jowin Paulose, Yashas Khot, Jess John, Isteqali Khan, and Siddarth Gosavi.

After each presentation, panel members gave insights on how to refine the concepts, identifying strengths and suggesting improvements. They discussed which ideas seemed most promising and offered guidance on technical and creative aspects to consider in the development phase.

A significant part of the session involved teams presenting their gamification strategies. The panel reviewed these ideas, providing constructive criticism and sharing innovative ways to enhance player engagement through gamification. This aspect of the meet underscored the focus on practical applications of game mechanics to foster an engaging user experience.

The ideation meet concluded at 5:40 PM, marking a productive day filled with creative discussions and expert feedback. Participants left with clear insights and actionable guidance to refine their game concepts, enhancing both their technical and creative approaches to game development.

The ACM DBIT Ideation Meet served as an invaluable opportunity for participants to gain practical advice from experts, setting a strong foundation for the next stages of game design and development.

Soundscape Survival - Escape the Haunted Forest

A voice-controlled horror-puzzle game where players navigate a haunted forest, using only sound to reveal paths, solve puzzles, and evade spirits.

Players control movement and actions with their voice's pitch, volume, and rhythm, making every sound choice impactful and adding an immersive layer of tension.

Louder sounds reveal more of the fog-shrouded landscape but attract enemies, while softer sounds keep the player hidden, adding a balance between exploration and stealth.

Randomized Enemy and Trap Locations
Sound-Responsive Spirits
Dynamic Environmental Feedback

- Fog Density and Sound Reflections
- Weather and Nature Sounds

Mystic Charms and Talismans : items that reduce noise levels or extend the duration of their

OUR PLAN

We aim to create an immersive 3D horror game, into the Abyss: Echoes of the Forgotten, where players explore the haunted Blackwood Manor, an abandoned Victorian estate steeped in dark mysteries and supernatural horrors. Taking on the role of Lena, a young Journalist, players unravel the chilling secrets of the Blackwood family, long vanished after a series of occult rituals gone wrong. Through eerie exploration, players encounter ghostly apparitions, solve challenging puzzles, and navigate a treacherous path toward an otherworldly realm known as the Abyss. This project combines atmospheric visuals, interactive horror elements, and a rich narrative to deliver a suspenseful gaming experience that keeps players on edge and eager to uncover every dark twist.

VISUAL CONCEPTS

Haunting Environments
Atmospheric settings designed to instill dread.

Nightmarish Entities
Unforgettable antagonists to challenge players.

Mind-Bending Puzzles
Challenges that test wit and courage.
