

**REPAIR + PARTS SERVICES****REPAIR**

**You want to have defects fixed as quickly and competently as possible so you can resume production right away while simultaneously lengthening the service life of your products? You can count on our repair service at any time.**

**Your requirements**

- Resume production as quickly as possible
- Fast and effective repairs by competent specialists
- Increase the reliability and availability of your machines and test systems
- Optimize the operating costs of your Komax equipment

**Your benefit**

- Fast, expert repair of defective machines and test systems
- Fewer unplanned downtimes
- Higher availability and reliability

**Description**

You enjoy the benefit of the experience that our service technicians have gained over many years on the job. We leave nothing to chance in our repair work, following standardized processes. So you can rest assured that repaired products from Komax will work just as well and reliably as new ones. We usually repair defects on site; depending on the type of defect, however, we may repair machine and test systems at a regional service center – or where they were manufactured.

**Scope of services**

- Thorough inspection and analysis of the defective equipment
- Precise definition of the scope of work and repair costs
- Repair using standardized repair processes
- Final inspection and functional test
