

# Series 70

*Flexible. Tactile and reliable.*

<https://eao.com/70>

# 70 Information about the Series

## Key advantages

- Full-face illumination
- Excellent tactile feedback
- Almost limitless design possibilities
- Easy-to-clean, UV-resistant films
- PCB mount switches

## Typical application areas

- Machinery
- Public transportation
- Heavy duty and special vehicles
- Marine
- Telecommunications
- Medical technology
- Energy supply
- Automation
- Building infrastructure
- Food and beverage industry

## Functions

- Pushbutton
- Illuminated pushbutton
- Indicator

## Design

- Flush

## IP front protection

- IP40

## Rating

- 42 VAC (100 mA)

## Terminal

- PCB

## Lens Material

- Plastic

## Markings

- Printed insert film legends

## Approvals

- CQC

## Conformities

- CE
- 2011/65/EU (RoHS)

## Switching element illuminated Part No. 92-851.342

### Switching system

Short-travel switching system with two independent contact points and tactile operation. Guarantees reliable switching even of very light loads 1 normally open contact

### Material

**Material of contact**  
Gold-plated silver

**Switching element**  
Plastic

### Mechanical characteristics

**Actuating force**  
With overlay foil 4 N  $\pm$ 0.2 N  
Max. actuating force >50 N, as per DIN 42115

**Actuating travel**  
Approx. 0.5 mm

**Resistance to heat of soldering**  
250 °C, 3 s (PCB assembly)  
320 °C, 3 s (when using a soldering iron)

**Mechanical lifetime**  
 $\geq$  5 Mio. operations (switching element without overlay)  
 $\geq$  1 Mio. operations (switching element under overlay)

**Protection**  
IP40 (only switching element)  
IP65 front side with overlay foil

### Electrical characteristics

**Electrical life**  
 $\geq$  500 000 cycles of operation at 42 VDC, 50 mA, as per IEC 60512-5-9c  
When attention is paid to the direction of current flow from terminal 3/4 to 1/2 the electrical life can be prolonged.

**Switching voltage and switching current**  
Switching voltage min. 50 mV AC/DC  
max. 42 V AC/DC  
Switching current min. 10  $\mu$ A AC/DC  
max. 100 mA AC/DC  
Power rating max. 2 W

**Electric strength**  
500 VAC, 50 Hz, 1 minute, as per IEC 60512-2-4a

### Ambient conditions

**Storage temperature**  
-40 °C ... +85 °C

**Operating temperature**  
-25 °C ... +70 °C

### Approvals

**Approbations**  
CQC

**Conformities**  
CE  
2011/65/EC (RoHS)

# 70 Technical data

## Switching element non-illuminated Part No. 70-100.0 and 70-101.0

### Switching system

Short-travel switching system with two independent contact points and tactile operation. Guarantees reliable switching even of very light loads 1 normally open contact

### Material

**Material of contact**  
Silver (Ag)

### Mechanical characteristics

**Actuating force**  
With overlay foil  $5\text{ N} \pm 2\text{ N}$   
Max. actuating force  $> 50\text{ N}$ , as per DIN 42115

**Actuating travel**  
0.3 mm

**Mechanical lifetime**  
500 000 operations with overlay

**Protection**  
IP65 front side with overlay foil

### Electrical characteristics

**Electrical life**  
at 5 VDC, 1 mA 500 000 cycles of operation

**Switching voltage and switching current**  
Max. 12 VDC, 50 mA  
Min. 1 VDC, 10 mA

**Electric strength**  
250 VAC for 1 minute

### Ambient conditions

**Storage temperature**  
 $-30^\circ\text{C} \dots +85^\circ\text{C}$

**Operating temperature**  
 $-20^\circ\text{C} \dots +70^\circ\text{C}$

### Approvals

**Approbations**  
CQC

**Conformities**  
CE  
2011/65/EC (RoHS)

## Switching element non-illuminated Part No. 70-201.0

### Switching system

Short-travel switching system with two independent contact points and tactile operation. Guarantees reliable switching even of very light loads 1 normally open contact

### Material

**Material of contact**  
Gold-plated silver

**Switching element**  
Plastic

### Mechanical characteristics

**Actuating force**  
With overlay foil 2.1 N ± 0.2 N  
Max. actuating force > 50 N, as per DIN 42115

**Actuating travel**  
Approx. 0.5 mm

**Resistance to heat of soldering**  
260 °C, 3 s, as per IEC 60068-2-20

**Mechanical lifetime**  
≥ 5 Mio. cycles of operation (switching element without overlay)  
≥ 1 Mio. cycles of operation (switching element under overlay)

**Protection**  
IP40 (only switching element)  
IP65 front side with overlay foil

### Electrical characteristics

**Electrical life**  
≥ 500 000 cycles of operation at 42 VDC, 50 mA, as per IEC 60512-5-9c  
When attention is paid to the direction of current flow from terminal ¾ to ½ the electrical life can be prolonged.

**Switching voltage and switching current**  
Switching voltage min. 50 mV AC/DC  
max. 42 V AC/DC  
Switching current min. 10 µA AC/DC  
max. 100 mA AC/DC  
Power rating max. 2 W

**Electric strength**  
500 VAC, 50 Hz, 1 minute, as per IEC 60512-2-4a

### Ambient conditions

**Storage temperature**  
−40 °C ... +85 °C

**Operating temperature**  
−25 °C ... +70 °C

### Approvals

**Approbations**  
CQC

**Conformities**  
CE  
2011/65/EC (RoHS)

Suppressor circuits

When switching inductive loads such as relays, DC motors, and DC solenoids, it is always important to absorb surges (e.g. with a diode) to protect the contacts. When these inductive loads are switched off, a counter emf can severely damage switch contacts and greatly shorten lifetime.

Fig. 1 shows an inductive load with a free-wheeling diode connected in parallel. This free-wheeling diode provides a path for the inductor current to flow when the current is interrupted by the switch. Without this free-wheeling diode, the voltage across the coil will be limited only by dielectric breakdown voltages of the circuit or parasitic elements of the coil. This voltage can be kilo-

volts in amplitude even when nominal circuit voltages are low (e.g. 12VDC) see Fig. 2.

The free-wheeling diode should be chosen so that the reverse breakdown voltage is greater than the voltage driving the inductive load. The DC blocking voltage (VR) of the free-wheeling diode can be found in the datasheet of a diode. The forward current should be equal or greater than the maximum current flowing through the load.

To get an efficient protection, the free-wheeling diode must be connected as close as possible to the inductive load!

Switching with inductive load  
Fig. 1

Counter EMF  
over load without free-wheeling diode  
Fig. 2

Note for soldering

Process parameter for wave soldering  
Basic specification for wave soldering J-STD 75 W4C.

Maximum temperature on the component side (Temp 2): (Temperature must not exceed during the entire processing)	120 °C
Preheating phase (t1 ... t2): Ramp up:	70 ... 120 sec typ. + 1 °C/sec
Ramp up to maximum temperature (t2 ... t3):	not defined
Maximum temperature on the soldering side (Temp 3): Maximum time of soldering process (t3 ... t4):	250 °C 3 sec
Ramp down at 170 °C:	typ. - 2 °C/sec

## Temperature curve wave soldering

Green curve: Temperature on the component side of the pcb  
Red curve: Temperature on the soldering side of the pcb

Room temperature: Temp 1

Preheating: Temperature process = Temp 1 ... Temp 2  
Process time = t1 ... t2

Ramp up to soldering temperature: Process time = t2 ... t3

Soldering phase: Temperature process = Temp 3  
Process time = t3 ... t4

## Iron soldering

Basic specification for iron soldering IEC 60068-2-20

Maximum temperature at tip of iron: 320 °C  
Maximum soldering time: 3 sec

## Cleaning/Lacquering

The switching elements are not sealed. Cleaning up the PCB may damage the contacts in the switching elements. For this reason, the following points should be noted:

- When soldering make sure that the flux does not pass on the upper side of the PCB.
- When cleaning the PCB with detergents ensure that no dust or other debris may get inside of the switching elements.
- Ensure that no lacquer penetrates into the interior of the switching element when lacquering the PCB.

## Storage of components

To obtain the optimum solderability of the components, the following points should be noted during storage:

- Do not store components in locations with high temperature or humidity.
- Do not expose components to corrosive gases.
- Avoid direct sunlight for a long period.
